How a Title Package Works

01

THE TITLE

The hook and the handle

It's what gets remembered, repeated on podcasts, and typed into a search bar — and it carries the highest weight in retail search. It doesn't have to explain the book; it has to make someone pick it up.

02

THE SUBTITLE

The promise and the keywords

Second-highest search weight, so it works hardest using the words real buyers type — *founder, consumer brand, building, scaling, selling* — while making the title's promise concrete. A playful title over a working subtitle is the strongest combination in this genre.

03

DESCRIPTION & METADATA

The sweep-up

Category browsing, name association, half-remembered searches — everything else routes through the book description, backend keywords, and author bio. Nothing is lost by keeping it off the cover.

The Cover Byline Carries Suja

Whichever direction wins, the Suja connection is on every cover — in the byline, under your name, rather than spending subtitle real estate.

“Suja” is a search term this book can own: the only other Suja title on the shelf is *The Suja Juice Solution*, your 2015 co-authored recipe book — no competing voice, no confusion. Anyone searching “*Suja book*,” “*Suja founder*,” or “*the Suja guy’s book*” finds this one from the description, keywords, and author bio alone.

That frees the subtitle to fight for the contested keywords — and it’s why every concept on the next page carries the same byline:
