

Jeff Church Marketing Strategy

Overall vision: 1 set ourselves up with the right systems for creating and sharing more value in a cohesive way across all of our platforms so we can keep people engaged in the ecosystem so it increases the likelihood of them signing up for a paid offer (i.e. building the value funnel) and then 2 is increasing the funnel by getting more people into our ecosystem (big KPI is email signups and # of paying members). In other words...we need to create an ecosystem that sets us up to nurture leads and convert them into paying clients. And then we need to go fill that ecosystem.

1. Leverage Free Resources Page

Each free resource requires them to give us their email so we can get them into our system and then into a core-nurturing email sequence. This is something we can drive people to and will be a lead magnet.

1. Email Marketing

Update all email flows for whenever someone signs up for something, they get entered into a 9-email, 30 day automatic email sequence. Plus will enter all existing 1k contacts into a separate nurturing sequence.

Create a general 1x/week email marketing blast so we can hit the list and have you stay top of mind/top of the inbox where we are providing value and not just hitting them up for an ask every couple months.
